## INSULATION SNAKES®- Gazelle's Group of Companies

Insulation Snakes was founded in Breton, Alberta under the leadership of Brian Impey. Brian began this business originally under the company name of Gazelle's Oilfield Service in 1985. This company was expanded in the United States originally in Casper, Wyoming, and was later moved to Billings, Montana, under the name Gazelle's Oilfield Service, dba Insulation Snakes. The head office is in Breton, Alberta where product is made and it owns and operates the manufacturing plant in Billings, Montana.

Brian Impey, who was and is still working in the oilfield, was tasked by a client "to insulate a wellhead, but to not spend any money". After experimenting with different options, he came up with a low cost, effective solution, which we now know as Insulation Snakes.

The demand for Insulation Snakes grew. Today, Insulation Snakes is wholly owned by Gazelle's Group of Companies and is the leader and the standard for removable, reusable, weatherproof insulation that is economical and easy to use. Insulation Snakes is widely used in the oilfield, and is currently looking at servicing other markets.

Insulation Snakes has recently been granted a Certified Management system ISO 9001:2015 in Canada and is currently seeking the same for their US offices.

# INTRODUCTION TO INSULATION SNAKES™

### What is an Insulation Snake?

It is a very unique product that has been on the market for around 30 years. It was originally designed as a low cost alternative to expensive insulation applications. It does that, and more. They were designed to wind around the pipe, and because they are long and narrow, they resemble a snake, and thus, its unique name "Insulation Snake™".

### What is it made out of?

It is made out of specific environmentally friendly Fiberglass batting encased in a UV treated Polyethylene vapor barrier. The additive in the UV treated Poly is estimated to extend the life of the product by four to five years.

### What does the "Insulation Snake" do?

Insulation, the first and foremost, is meant to restrict the movement of heat or.. in other words, keep the heat in or out. the R-value is a measure of resistance to heat flow through a given thickness of material. In theory, the higher the R-value, the greater that resistance. The majority of our product has a certifiable R-11 (USA)/R-12(CAN) rating, but we also have some product with a certifiable R-13(USA)/R-14(CAN) rating.

**WRAP IT!**

**STRAP IT!**

## FAQ's

### Who uses the product?

Originally designed for the Oilfield, it is used by Electricians, Plumbers and Insulators in Industrial applications, Irrigation on applications, and those who own homes and RV's. Anywhere there is a fluid (*such as water*) that can freeze in pipes, pumps or vessels, an Insulation Snake™ is used. Anyone working in the industry, as well as residential markets, use Insulation Snakes™.

### Can I cut my Insulation costs down by using Insulation Snakes™?

Yes! One company claims that by using the Insulation Snake™ system, they have cut costs by 50-60%. They've been able to do this because of easy accessibility to what is being insulated, the installation does not demand highly skilled workers, and because of the small cost of the finished product. Every case is different, but the savings are always there.

### How long will an Insulation Snake® last?

Depending on the application and environment, you can expect approx. 5 years of life expectancy.

### How much pipe can an Insulation Snake spiral wrap?

The following list applies to our Original Snakes®. The Sidewinder differs in the fact that it insulates the same linear length as its own linear length. Linear coverage will vary depending on the amount of overlap used during the installation, if any. Our estimates on coverage per Insulation Snake® are only meant as a general guideline.

#1210 covers 6'6" of 2" pipe, 5'6" of 3" pipe and 5' of 4" pipe

#1220 covers 12' of 2" pipe, 10'6" of 3" pipe and 8'6" of 4" pipe

#1810 covers 8' of 3" pipe, 7' of 4" pipe, and 6' of 5" pipe

#1820 covers 12' of 3" pipe, 10' of 4" pipe and 8' of 5" pipe

#2410 covers 10' of 4" pipe, 8' of 5" pipe

#2420 covers 13' of 4" pipe, 9' of 5" pipe

### What is the difference between spiral wrapping an original Insulation Snake® onto a pipe and using a Sidewinder™?

Our original Insulation Snakes do not come with straps attached and are spiral-wrapped around the pipe. They can be fastened at the ends using our buckled straps, which can be purchased separately. The Sidewinder™ has buckled straps riveted onto the snake at every foot. They attach to the pipe in a linear fashion and are easily removed if needed. You would need a smaller quantity of Sidewinder's™ because you aren't losing footage like you do when spiral-wrapping.

### What is the difference between the black and the tan Insulation Snake®?

Our original Insulation snakes have black, UV treated 5ml. polyethylene, a R-11(USA)/R-12(CAN) rating. Our tan Insulation Snakes have tan, UV treated 5ml. polyethylene with rodent deterrent in the poly and insulation with a R-13(USA)/R-14(CAN) rating.

### What is the heat rating of Insulation Snake®?

Insulation Snakes® can withstand temperatures up to 202°F or 96° C. At this temperature, the polyethylene sheathing will begin to soften. Higher temperatures will cause it to melt away from the heat source.

### Can the Insulation Snake® be cut down to the length that I require?

No, we do not suggest cutting Insulation Snakes® because our special seal helps keep moisture and rodents out. Our product has a unique design feature that allows internal air flow, while restricting moisture.

### TECHNICAL INFORMATION

Thickness recovery of fibreglass insulation deteriorates over time while it is compressed in a roll. That is why...

Avoid over tightening product. The tighter Insulation Snakes® are rolled, the more glass fibres are broken, compromising the integrity of the fibreglass fibres.

Insulation Snakes® uses a virgin blend (*NOT RECYCLED*) 5ml. polyethylene exterior sheathing, giving it excellent puncture and tear resistance. We do not use thicker polyethylene, so as to not damage the integrity of the fibreglass fibres.

Extra UV protection is added to the polyethylene during the manufacturing process, which increases the life of our products. This allows Insulation Snakes® to be exposed to weather for extended periods of time.

The polyethylene sheathing will soften when temperatures exceed 202°F (96°C). Our insulation products remain flexible and functional at very cold temperatures as well.

Insulation Snakes® ships products in blue polyethylene bags, which also have extra UV protection added during the manufacturing process, allowing for temporary outside storage.

Our straps utilize molded nylon buckle, which allows for quick and easy removal and installation, even in cold, wet and dirty conditions.

Insulation Snakes® stands behind all of our products. All products are guaranteed against defects in workmanship and material that may have occurred during the manufacturing process.

## TWO LEVELS OF PRODUCT:

### THE 'ORIGINAL' INSULATION SNAKE®

#### THE INDUSTRY STANDARD

- Black Color (standard)
- Certifiable
  - R-11(USA)/R-12(CAN) rating
- UV Treated polyethylene
- 5 mil. polyethylene
- Extreme variety in size options, from 6" wide to 8'
- From 5' to 20' in length
- Competitive product
- First on the market - Imitated by some
- Majority of product sold is this product line
- In the market for over 30 years

### THE SUPER SNAKE®

#### OUR PREMIUM PRODUCT

- Tan Color
  - Not as attractive to the Corvus (crows etc.) family as the black
  - USA color compliant
- Certifiable
  - R-13 (USA)/R-14(CAN) rating
- UV treated polyethylene
- 5 mil. polyethylene
- Rodent deterrent in the polyethylene
- Higher puncture resistance
- Available up to 48" wide and 20' in length

## STANDARDS

TOPICS	COMMENTS	APPLICABLE CODE
Fire Resistance Classification:	Max. flame spread index of 25 Max. smoke spread index of 50	UL-723 ASTM E84 NFPA 255; Can/ULC S102-M88 Non-Combustible according ASTM 136
Water Vapor Absorption:	No greater than 5% per weight	Code: ASTM 1104
Fungi Resistance:	Pass test	Code: ASTM C1338C
Insect Resistance:	100% mortality rate	
Corrosiveness:	Meets requirements for steel, copper and aluminum	Code: ASTM C665
Flash Point:	600°F or 300°C	
Melting Point of	202°F or 96°C	
Polyurethane	Dry chemical, carbon dioxide or water	
Extinguishing Method:	1.22	
Specific Gravity of Insulation	Oxides of nitrogen and carbon	
Hazardous Combustion	R11(USA)/R-12(CAN) product: 0.04196 w/m2.C	

## THE “ORIGINAL” INSULATION SNAKE

Installed by spiral wrapping down the length of the pipe. No straps attached.

- Available in various widths and lengths
- Constructed of certifiable, fibreglass insulation
- Sheathed in 5 mil. polyethylene with extra UV protection
- Use Snake Straps for convenient installation and removal
- Custom sizes available upon request

### THE ‘ORIGINAL’ INSULATION SNAKE

#### THE INDUSTRY STANDARD

Black Color with Standard R-Rating.

### THE COBRA TAN

#### OUR PREMIUM PRODUCT

Tan Color with Higher R-Rating and Rodent Deterrent.

PHONE: 1-780-696-3412 | TOLL FREE: 1-888-696-2567

FAX: 1-780-696-2567 | EMAIL: [sales@insulationsnakes.com](mailto:sales@insulationsnakes.com)

[www.insulationsnakes.com](http://www.insulationsnakes.com)

BRETON, ALBERTA, CANADA • BILLINGS, MONTANA, USA

SIDEWINDER™

The Sidewinder™ is ideal for a low clearance application. When a pipe that is to be insulated is situated close to another pipe, building wall or on the ground, the Sidewinder™ is slipped in between and folded around the pipe. It has permanently attached straps, placed approximately every foot, and is easily fastened into place.

- The improved answer to insulating oilfield surface piping, water and sewer lines underneath manufactured homes (*mobile homes*), fuel gas lines, etc.
- Ideal for insulating hose that is laying on the ground
- Compatible with electrical heat tape
- Factory installed straps allow for quick access to any point on the line
- Very compatible with the Insulation Snakes® Snake Bite
- Professional appearance

SIDEWINDER FITTING CHART	
Available in Tan Poly up to 48" wide and Black Poly up to 96" wide	
NPS (Nominal Pipe Size)	SideWinder Width
¼ – ¾"	6"
1" – 1 ½"	12"
2" – 2 ½"	18"
3" – 5"	24"
6" – 8"	36"
10" – 12"	48"
14" – 16"	60"
18" – 20"	72"
22" – 24"	84"
26" – 28"	96"

NOTE: The outside diameter of the pipe is important.

## **SLAKEBITE** | Ball Valve / Check Valve Cover / Flange

Snake Bites are used to cover valves, flanges, fittings and more. The handle extends outside the insulation for quick and easy valve adjustment. The Snake Bite is designed to cover anywhere you need quick access without having to deal with the rest of the insulation. Eg: Flanges, hammer union connections, in-line ball valves, check valves and/or cam lock fittings.

It can be used independently, or in conjunction with the Sidewinder™ and the Original Snake product. The Snake Bite has straps permanently fixed for ease of installment and to eliminate the need to use other components of fastening. It compliments heat tracing and the temperature can withstand up to 202°F or 96°C. We can provide Snake Bites to suite your required lengths.

Ideal for insulating ball valves, the Snake Bite is folded back to the exact diameter of the ball valve and the handle protrudes outside the insulation for quick and easy valve adjustment.

- Factory installed straps allow for quick and easy installation and removal
- Can be used independently or in conjunction with other products
- Custom sizes are available upon request
- Please find our sizing charts on the next page

## SNAKE BITES

We've now replaced our Flange Covers with Snake Bites. Snake Bites are used to cover Valves, Flanges, Fittings and more. They are designed to cover anywhere you need quick access, without having to deal with the rest of the insulation.

To find out which Snake Bite you will need, please see one of our fitting charts. The first being for Ball Valve, Check Vales and the like. The second chart is used for Flange Cover conversions.

SnakeBITE | Ball Valve / Check Valve Cover / Flange

AVAILABLE IN **TAN** and **BLACK**

For PRODUCT DETAILS, refer to the Oilfield Details Guide, beginning on Pg.24.

## PRO-WRAP for Propane Tanks

### OPTION "ACCESS"

New and improved style cover with access to center controls.

Also available in tan.

### OPTION "COVERED"

New and improved style cover with no access to top controls.

Also available in tan.

Sizes are for 500, 1000 and 2000 gallon propane tanks. Ask about our larger custom product designs as well.

### THIS COVER IS DIFFERENT!

The new cover allows the snow to fall off the tank easier than the old style. It comes with a pre-cut diamond shape access hole for the controls which is in the center known as "Access", or it comes with no precut access hold totally covering the top of the tank known as "Covered". Recommended as a two+ person install.

## SCRUBBER / PROPANE TANK COVER

**100 lb PROPANE BOTTLE**  
(SCB6010)

**SCRUBBER**

- Designed to insulate fuel gas scrubbers or similar vessels  
Eg: 100lb. propane bottle, 45 gallon drum, manifolds, etc.
- Sizes are 3, 4, 5, 6, 7 and 8ft. in height and 4, 6, 8, 10 and 12ft. in circumference
- Built with straps attached
- Easily and quickly installed or removed
- Custom sizes available upon request

AVAILABLE IN **TAN** and **BLACK**

For PRODUCT DETAILS, refer to the Oilfield Details Guide, beginning on Pg. 24.

## PLUNGER LIFT LUBRICATOR COVER

Fiberglass insulation with certifiable R-11(USA)/R-12(CAN) value, sheathed in 5 mil. polyethylene with extra UV protection.

**This specialized hood comes in two sizes:**

- Part #PLLC1804 is 18" wide and 4' tall
- Part #PLLC2404 is 24" wide and 4' tall
- Specifically designed to insulate plunger lift lubricators
- Built with straps attached
- Quick and easy installation and removal
- Custom sizes available upon request

### DID YOU KNOW?

The blue polyethylene bags that we ship our products in also have extra UV protection added during the manufacturing process, allowing for temporary outside storage.

## PIG IN A BLANKET

### DID YOU KNOW?

All Products may be returned for up to a 20% restocking fee, provided they are in re-saleable condition when returned within 90 days of purchase, along with copy of the original invoice.

- Removable, reusable and weatherproof insulation
- Fibreglass insulation, with Certifiable R-12 value sheathed in 5 mil. polyethylene with extra UV protection
- The end closure may be accessed easily and quickly to send or receive a pig
- Built with straps attached
- Opens on 2 connected sides and sealed on 2 connected sides
- May also be used as a 90° insulated elbow for pipe, or to insulate a tank or manifold
- Many standard stock sizes available, length sizes from 3, 4, 5, 6, 7 and 8ft. and circumference sizes from 48, 72, 96, 102 and 144"
- Easily and quickly installed or removed
- Custom sizes available upon request

AVAILABLE IN **TAN** and **BLACK**

For PRODUCT DETAILS, refer to the Oilfield Details Guide, beginning on Pg. 24.

# PYTHON

### DID YOU KNOW?

Our products are made for Oilfield, Commercial, RV and Residential markets.

- Pythons come in kits with required straps and hooks. 2x4s must be provided by customer
- Removable, reusable and weatherproof insulation with straps attached for insulating storage tanks
- Instructions are provided with each Python
- Fibreglass insulation with a Certifiable R-11 (USA)/R-12(CAN) value sheathed in 5 mil. polyethylene with extra UV protection
- Our suspension system allows the tank to be insulated from a 4' height to the full height of the storage tanks or to any height in between and prevents the python from sagging or sliding down the storage tank
- Standard stock sizes are available for 100, 400, 500, 750 and 1000 bbl. storage tanks
- Available in 3 standard height sizes: 4', 6' and 8'
- Insulation Snakes® Grommet works well with this product
- Custom tank tops and sizes are available upon request
- 2' x 4's required, but not provided
- Recommended as a two+ person installation

For PRODUCT DETAILS, refer to the Oilfield Details Guide, beginning on Pg. 24.

AVAILABLE IN **TAN** and **BLACK**

## WELLWRAP

Wellwraps are designed to completely insulate the wellhead and eliminate the need to unwrap and rewrap snakes for well head service.

- The wellwrap is a one-piece insulated, removable, reusable and weatherproof blanket, complete with straps
- Sizes range from 3'-8' in height and 4'-32' in wellhead circumference
- Insulation Snakes® Grommet works well with this product.
- Wellwraps must rest on the ground when installed
- Insulation Snakes® Wellwraps require no on site modifications and have straps and buckles to close all openings securely to minimize heat loss
- There is a 4' adjustment on Wellwraps. A Wellwrap is able to adjust 4' to fit a smaller wellhead
- There is only a 2' adjustment on the 8' long Wellwraps
- Custom sizes available upon request
- Recommended as a two+ person install

AVAILABLE IN **TAN** and **BLACK**

For PRODUCT DETAILS, refer to the Oilfield Details Guide, beginning on Pg. 24.

## HOODS

### IN-LINE HOOD

- Available in two different styles
- In-Line Hood ideal for Motor Valve Installation
- Designed to insulate pressure switches, risers, gate valves, gauges, tanks, barrels and other upright items
- Built with straps attached to the hood for easy installation and removable
- Sizes are available from 2-16' circumference and 1-10' in height
- Custom sizes available upon request

### RISER HOOD

For PRODUCT DETAILS, refer to the Oilfield Details Guide, beginning on Pg. 24.

AVAILABLE IN **TAN** and **BLACK**

## GROMMET

- Used as a hand hole to access valves, etc., within the Insulation Snakes® product
- Used as a view hole to observe thermometers, gauges, etc., within the Insulation Snakes® product
- Supplied with our Pro-Wraps and also sold separately. This two-piece insert allows the pressure relief valve to vent outside the blanket into the atmosphere
- Hand hole access is 3.5" (8.9cm) in diameter
- Insulation Snakes® Grommet will protect the insulation from the elements and rodent damage much better than tape applied around the hole
- Easily installed on-site
- Instructions and all hardware provided
- Professional appearance

### DID YOU KNOW?

All of our insulation products are compatible with electrical heat trace. Insulation Snakes® products are manufactured using Certifiable R-11(USA)/R-12(CAN) insulation - which uses 3-1/2 Fiberglass Batting Insulation.

## SNAKE STRAP

Our Snake Straps utilize a custom molded nylon buckle, which allows for quick and easy removal.

- Less likely to cinch too tight
- Locally made
- No supply chain issues
- Rust proof
- Lighter to ship

- Highly recommended to hold our original Insulation Snake® on pipe
- When installing the Installation Snake® onto a pipe, the Snake Strap replaces tape, wire, string, etc.
- It makes removal and re-installation easier and will not damage the Snake
- Popular for oilfield, recreational, light industry or agricultural use as a light duty e-down or tarp straps replacement
- Consists of 1" wide nylon webbing and a custom molded, nylon buckle
- Standard stock sizes are 2', 3', 4' lengths
- Professional appearance
- Custom lengths are available upon request

Please note that it is important not to over-tighten the strap as this will cause a loss of R-Value on the Insulation Snake®.

For PRODUCT DETAILS, refer to the Oilfield Details Guide, beginning on Pg. 24.

### CUSTOMIZED PRODUCTS

*\*Please allow 2-3 days to complete pricing and drawings for all custom products*

#### CUSTOM ORDERING:

To place a custom order, please have the following information ready for the sales desk:

- Photo or diagram
- Tank dimensions - diameter or circumference & height
- Stand dimensions - width (widest part of the stand), length (longest part of the stand), height (ground to the top of the tank)
- Containment Ring - length, width and height
- Dimensions of any openings that will need to be on the product

For PRODUCT DETAILS, refer to the Oilfield Details Guide, beginning on Pg. 24.

AVAILABLE IN **TAN** and **BLACK**

*\*In Cobra Tan polyethylene, any size wider than 48" is considered a Custom Product as it requires more time and materials to build. \*\*We would advise purchasing an extra SSB200/ESB200 to help conform to curve, as these sizes of Sidewinder's only have 2 straps instead of 3.*
